

Fondation Qualité Fleurier

La haute horlogerie certifiée

Fleurier Quality Foundation

New horizons for the most demanding watch industry certification

Created in 2001 with the aim of establishing criteria for the technical and aesthetic quality of watchmaking construction in accordance with the best principles of *Haute Horlogerie*, the Fleurier Quality Foundation continues to fulfil its certification role despite the withdrawal of three companies from its board. It is relocating to the premises of Chopard Manufacture in Fleurier, while remaining a totally independent institution under the presidency of Mr Jean-Patrice Hofner.

With the support of its Fleuritest machines, the Fleurier Quality Foundation conducts comprehensive inspection of the timepieces submitted to it, with a view to combining in a single certification a set of exclusive requirements guaranteeing end customers the acquisition of watches that are:

- 100% made in Switzerland
- Guaranteed precision in any circumstance
- Endowed with proven reliability and durability
- Distinguished by exclusive aesthetic finishing quality

Fondation Qualité Fleurier

La haute horlogerie certifiée

In its 21 years of existence, the Fleurier Quality Foundation has certified more than 2,300 watches according to a set of specifications recognised as the most demanding in the watch industry.

For reasons specific to the development of their products, Parmigiani Fleurier S.A., Vaucher Manufacture Fleurier S.A. and Bovet Fleurier S.A. are withdrawing from the Fleurier Quality Foundation.

To ensure the continuity of this institution, which contributes to safeguarding the most highly qualified professions in the field of *Haute Horlogerie*, Chopard is now hosting the Fleurier Quality Foundation on its premises at Chopard Manufacture in Fleurier. A new testing method has been developed in collaboration with the Dubois S.A. Laboratory, an authority with skills and impartiality that are widely recognised within the watch industry.

The Fleurier Quality Foundation remains totally independent, under the aegis of its President Jean-Patrice Hofner and the strict control of its Technical Committee.

The Foundation is of course open to any Maison wishing to bring essential control-related added value to its *Haute Horlogerie* creations and to submit to its five certification criteria (see <https://www.qualite-fleurier.ch>).
